

## **BI PROJECT MANAGER**

We are looking for an experienced full-time project manager with skills to lead global business intelligence, reporting and analytics projects and programs. The project manager will manage large and complex business intelligence development projects for different clients in the manufacturing, distribution and retail industries.

APPLY

### **Responsibilities:**

- Provide effective leadership and management of the project team, including executing end to end project lifecycle, planning resources, communicating status, and brokering team development.
- Identify and communicate project risks and issues, and facilitate mitigation strategies according to risk likelihood. Monitor progress of issue resolution and negotiate solutions as necessary.
- Coordinate and participate in solution testing to guarantee high-quality BI solutions.
- Communicate BI roadmap, project status and issues and propose/present resolution and workaround options.
- Ensure appropriate training of users, helpdesk and operations team at the end of each project/release.
- Run project post-mortem analysis to capture improvement ideas for future projects.
- Participate in organization-wide BI process improvement initiatives to fine-tune our BI delivery approach and best practices.
- Support regular analytical needs for our business stakeholders (i.e. data mining, data analytics, etc.)
- Apply advanced project management and quality/process improvement methodologies to assure uniformity, standardization and repeatability of BI solutions.
- Drive process consistency and efficiency, along with the different teams, to ensure uniformity, standardization and repeatability of reports in a turnkey manner.

### **Qualifications**

- 10+ years of experience in leading IT projects, including business intelligence projects.
- Bachelor degree in computer science, business management, accounting or a similar discipline.
- Advanced project management skills: Ability to lead and motivate professionals to produce high-quality results on time and within budget.
- Management of projects with a budget of minimum \$1 million (at least one or two projects).
- Experience with structured systems development and project management methodologies.
- Ability to multitask and manage multiple deliverables and projects at the same time.
- Excellent written and verbal communication skills in customer settings and with internal senior management. Solid active listening, facilitation and presentation skills.
- Bilingual (French and English).

- PMP certification or MBA an asset

#### **Technical/Business Intelligence Know-How**

- Demonstrated understanding of BI technology and experience in leading BI or IT projects.
- Knowledge of:
  - BW;
  - SAP BPC;
  - BO.
- Basic data modeling and database design understanding.
- Experience with BI visualization tools and their implementation.
- Proficient in data mining and data analysis/interpretation of results.
- Experience with ERP systems.
