

Leveraging the **benefits** of digital **transformation** in the Financial Services industry

Learn how Beyond Technologies helped a diversified international management and holding company support their core business operations with leading-edge technology from SAP.

CASE STUDY

Company background

With a broad range of companies in the financial services, asset management, sustainable and renewable energy, and other business sectors, this customer was experiencing a number of operational and business process issues with their current solution.

No longer able to support the lag in productivity, this global corporation launched the search for a new cloud-based solution that would stabilize their current operations and set them on a path for future growth and expansion.

Company info

- Offers financial services in North America, Europe and Asia
- Several divisions and franchises

Technology solutions implemented

- SAP S/4HANA Cloud
- SAP Analytics Cloud
- SAP Cloud Platform
- SAP Concur Expense
- SAP Concur Invoice

Standing apart from competition with intelligent ERP

Transforming your business requires the right technology. This financial services corporation turned to SAP S/4HANA Cloud, an intelligent, integrated ERP system to meet all their needs and support their rapid growth:

- System that would adapt to the specific regulations and processes of all their international locations
- Standardized business processes based on a global model
- Complete audit trail and visibility across their global accounting system
- Automated processes for financial closing
- Integration of complex business scenarios, postings and reconciliation

Digital transformation to fuel profitable growth

Now live with SAP S/4HANA Cloud, this Beyond client is reaping the benefits of their brand new system:

- Leverage a scalable solution to adapt to rapidly shifting markets
- Streamline their business processes across the organization's divisions
- Manage country-specific rules and regulations across the entire organization
- Enable better decision-making with standardized, automated business processes and advanced reporting features

The customer was very satisfied with Beyond's professionalism, responsiveness, technical knowledge and project management expertise. Thanks to comprehensive training sessions, the client's team is now fully independent with their SAP S/4HANA Cloud solution.

Why the customer chose SAP and Beyond Technologies

Beyond Technologies had established a solid reputation as an SAP S/4HANA Cloud integrator and came highly recommended by SAP as the go-to partner to help them drive growth and innovation.

Why SAP S/4HANA Cloud

- This client was looking for a unified solution that could easily support their business growth across multiple countries and SAP S/4HANA Cloud covered their entire functional range.
- SAP S/4HANA Cloud could meet the company's requirement for managing different legislations and currencies, as well as the implementation of complex posting and reconciliation processes.
- SAP S/4HANA Cloud offered the most flexible and adaptable cloud solution on the market, with smart applications built on the SAP Cloud Platform, simplifying third-party solution integrations.

Why Beyond Technologies

- Beyond Technologies demonstrated extensive expertise with similar clients and project scopes in the client's sector.
- Beyond's tailored project management and implementation approach (Activate for Cloud) ensured the best fit and a clear understanding of the company's business requirements.
- Beyond offered high credibility as an SAP Gold partner with several SAP accreditations and over 15 years of SAP experience with global organizations.
- Beyond provided an international team, with offices in Canada, France, the United States and South Africa, able to cover all time zones and seamlessly execute this international go live.
- Resources for several key roles like solution and technical architecture, functional and technical experts, but also change management support for testing, training material and end-user support as well as full support for master data conversion.
