

## SAP COMMERCE CLOUD SOLUTION ARCHITECT

---

Beyond Technologies is a professional services firm, specializing in the integration of SAP solutions and the optimization of business processes. We are looking for an enthusiastic, free-thinking and self-driven SAP Commerce Cloud Solutions Architect who will collaborate with others and help deliver highly complex SAP Commerce Cloud solutions to our existing clients.

As a SAP Commerce Solutions Architect you will join a growing delivery team at Beyond Technologies, where you will collaborate with a wide range of intelligent, dynamic colleagues touching the different SAP products such as the SAP CX suite of technologies (Commerce / Marketing / Sales / Service / Customer Data Cloud), S4 Hana and the different middle layers such SCPI and BTP.

---

### Your tasks:

- Be the Solutions Architect and Subject Matter Expert (SME) for the SAP CX suite of products with a focus on Commerce and Marketing, enablement and strategic planning. Inform clients using workshop presentations at client meetings
- Author System Design documents and translate / articulate functional and non-functional requirements clearly to the Developer and QA Analyst teams
- Analyze business use cases that are eligible for processes re-engineering
- Expert and In-depth knowledge of the different modules within SAP Commerce Cloud for B2B/B2C such as Search & Navigation (Solr), Order / Return Management, Pricing, Promotions, WCMS, Reports, User Management
- Knowledge in how SAP Commerce Cloud integrates with SAP CAR, S4, Marketing as well as third-party systems
- Knowledge in Order / Return Management (OMS), and integrating with the different Payment Service Providers (PSP)
- Work with cross-functional teams as defined by the Beyond SAP Customer Experience (CX) practise
- Work closely with clients to develop SAP Commerce and Marketing Solutions with a strong Customer Experience focus (as we work closely together with key customers to develop our solutions)
- Define the backlog items and lead the Discovery / Prepare / Explore / Realization and SIT / UAT phases
- Align on open topics with internal and external stakeholders from both Business and IT
- Create conceptual definitions of complex user requirements
- Contribute actively to customer engagement activities
- Interact with highly skilled SAP on-/off-shore development teams and stakeholders
- Own, plan, design and build market-leading software
- Act as the Domain Expert and Product Owner in an Activate and Agile development team. Creating, managing and grooming the requirements backlog
- Contribute regularly to the team spirit by supporting an environment of continuous learning, exchanging of ideas & thoughts and embracing Beyond Technologies' culture and innovation
- Negotiate with stakeholders and take tough prioritization decisions - leveraging latest technologies within our product

At Beyond, we want our employees to be happy and healthy both on and off the job. Everything we do and offer to our employees is based on our philosophy that investing in our people is good for all of us!

Beyond is dedicated and committed to promoting a diversified and inclusive work environment for everyone. Beyond Technologies is an equal opportunity employer and we believe in fostering an environment where everyone regardless of gender, race, ethnicity, sexual orientation, disability, age, or all other identities feels respected, protected and celebrated.

- Understand the market and competitors; identify and prioritize opportunities for existing products, new products and third-party integrations
- Work closely with the Chief and Technical Architects, User Interface Designers, Developers and Quality Assurance to translate high-level requirements into User Stories and review their implementation
- Work closely with Key Stakeholders to define the Product Vision, Roadmap, Requirements, Processes and Release Plan

#### You have:

- Minimum of a bachelor's degree (Computer Science, Software Engineering or a related discipline, or equivalent combination of education and experience)
- 4+ years professional services experience in software development
- Overall 10+ years of professional experience in software development, with a focus on delivering Commerce / Marketing / Sales and Service solutions
- 5+ years of Commerce business analysis and product management experience
- Working knowledge of one or more of the following industries: eCommerce, software, media, publishing, telecommunications, financial services would be beneficial
- Must hold a SAP Commerce Cloud certification
- Proven experience in working as a part of distributed teams
- Thorough understanding of SaaS technologies as well as the entire software development lifecycle.
- A keen interest in technology and new technology trends.
- Ideally you have a development background in Java or web applications
- Ideally you have knowledge of the SAP S4 and CX Applications
- Full proficiency and communication skills in English and French is required

#### You are:

- A continuous learner with the ability to quickly adapt to changing technologies, frameworks, etc.
- Capable and willing to work as a part of a self-organizing team
- Dynamic
- Resourceful
- Flexible
- Solution-oriented
- Entrepreneurial
- Authentic
- Creative, with innovative ideas
- Motivated and determined to succeed

At Beyond, we want our employees to be happy and healthy both on and off the job. Everything we do and offer to our employees is based on our philosophy that investing in our people is good for all of us!

Beyond is dedicated and committed to promoting a diversified and inclusive work environment for everyone.
