SENIOR SECURITY CONSULTANT

Beyond Technologies is a professional service firm, specialized in SAP solution integration and business process optimization. We are looking for a Senior Security Consultant to join our dynamic team.

You will help Beyond Technologies by collaborating with client resources to administer user access rights in SAP and its components. Your knowledge and understanding of security authorization concepts will be essential to provide accurate access to users and to offer technical support.

Your tasks:

- Create technical documentation on SAP Security blueprint design, Roles, Profiles and Authorizations development and configuration and ongoing support to the client
- Analyze user access requests and deliver appropriate access aligned with the client's segregation of duties rules;
- Proactively and operationally deliver support services to the clients
- Analyze and improve authorizations in all SAP landscapes including ERP, BI, SCM, PI, GRC and Solution Manager to achieve an optimal secure system, consistent with the requirements
- Architecting and designing SAP security solutions for SAP solutions on premise and cloud based
- Designing, developing and deploying custom security controls where required
- Complying with the processes, procedures, standards, tools and activities for software development and testing
- Aligning SAP security architecture with overall security framework
- Define and proactively use Change Management Processes for deployment and support in Role Change Management, User Change Management and User Access Controls
- Participate in internal and external audits related activities
- Update the system documentation

You have:

- A minimum of 10 of experience with Security for SAP, Fiori deployment
- Must hold a valid government security clearance
- Must have a minimum of 5 years of experience of building and maintaining SAP Security Roles, analyzing and applying SAP OSS notes related to SAP security
- Must have a minimum of 4 years of experience of working with SAP Security Authorization
- Must have a minimum of 3 years of analyzing and implementing security and authorization upgrade task in SAP 4X system to ECC 6.0 or higher
- Experience in implementing Single-sign on (SSO)
- Experience in SAP upgrade, migration, installation with complex systems landscape
- S4/Hana experience is a plus (Hana experience is a must)
- Excellent understanding of Internet protocols and security (HTTP(s), OData, SAML, OAuth, SSL certificates ...) as well as Identity Management solutions
- Experience with governance
- An ability to work in a team-oriented environment and interact effectively with others

- Relentless passion of the customer's success
- Exceptional verbal and written communication skills in English and French *(*This is a requirement[...] in this role you will be dealing with customers, partners and/or our international subsidiaries re[...] communication in English on a recurring basis both verbally and in writing)*

<u>You are:</u>
- Dynamic
- Flexible
- Resourceful
- A high energy individual with an entrepreneurial mindset, who can influence in a diplomatic manner
- Able to address objections with confidence and determination
- Strategic and tactical with excellent planning and execution skills
- Persistent, compliant and results driven
