BI & ANALYTICS CONSULTANT (FP&A)

Solutions Beyond Technologies is a professional services firm specializing in SAP solutions integration and business process optimization. We are looking for a Senior BI & Analytics (FP&A) to join our dynamic team.

You will be an expert resource in the SAP BI solution within Beyond Technologies and our clients. You will be the person that stakeholders trust to work and collaborate with because of your ability to manage complex financial challenges by finding cost effective solutions while demonstrating the value of your expertise and our solutions.

Your missions:

- Manage activities and documentation of deliverables and functional/technical design
- Execute functional requirements as input to deliverable design
- Drive deliverable build, test and deployment activities
- Plan and execute data conversion activities
- Develop a target image for the implementation of financial, management control, personnel and logistics indicator systems
- Track key financial measures and processes
- Drive continuous improvement for the BI team and the business
- Participate in the delivery, accuracy and integrity of information leading to financial solutions
- Plan and design modern input screens for the various planning processes
- Develop technical solution scenarios based on SAP Analytics Cloud, SAP S/4HANA
- Carry out parameters and developments with CDS views in S/4HANA
- Model and create SAP Analytics Cloud (SAC) reports
- Write user supports and lead user training sessions

You have :

- You have at least 5 years of significant experience in BI implementation projects (ETL/DataWarehouse/Cube Modeling/Reporting) and in particular in SAP Cloud Analytics (SAC)
- You have experience in financial planning and analysis (FP&A)
- You have experience with SAP Business Planning and Consolidation and/or SAP Analytics Cloud Planning
- You have an accounting background, a CPA is an asset
- Good expertise in SAP S/4HANA embedded analytics
- Good functional experience with ERP and SAP S/4HANA on different modules (FI CO / SD / MM...)
- A good understanding of the SAP ecosystem (SAP ERP, SAP S/4HANA, SAP BW, SAP Datasphere, SAP SAC...)
- Expertise with SQL and Python development skills is an asset
- You are passionate about innovative technology topics (SAP Analytics Cloud, Embedded Analytics...)
- *Exceptional verbal and written communication skills in English and French (*This is a requirement since in this role you will be dealing with customers, partners and/or our international subsidiaries requiring communication in English on a recurring basis both verbally and in writing)*

You are :

- Solution-oriented
- Diplomatic
- Creative, with innovative ideas
- Self-motivated and determined to succeed
- Autonomous and able to show leadership
- Rigorous, analytical and problem-solving
