

Beyond's Analytics Accelerator

Production Planning

At a glance

With Beyond's accelerator for Production Planning, increase production efficiency and minimize waste with a Production Effectiveness report, a weekly Production Plan Attainment snapshot, and a Time Gap Analysis report.

Anticipate production issues with a comprehensive overview of work center-level Key Performance Indicators (KPIs), evaluate weekly performance at work center, plant, and management levels and identify bottlenecks through the analysis of production time gaps.

Beyond's Analytics expertise

Strong analytics team of senior SAP consultants who can help you with:

- Architecture, development & integration
- Evolution & optimization
- Project or on-demand mode
- Training

Expertise in all SAP Analytics technologies

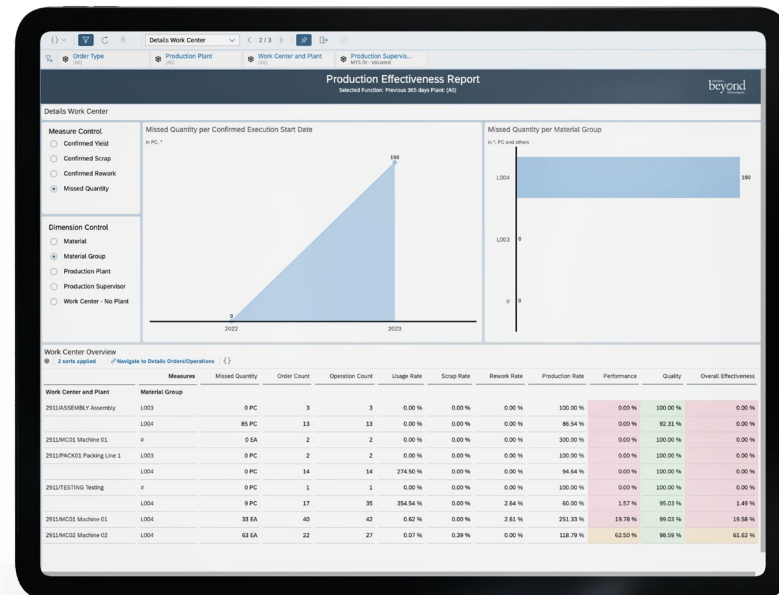

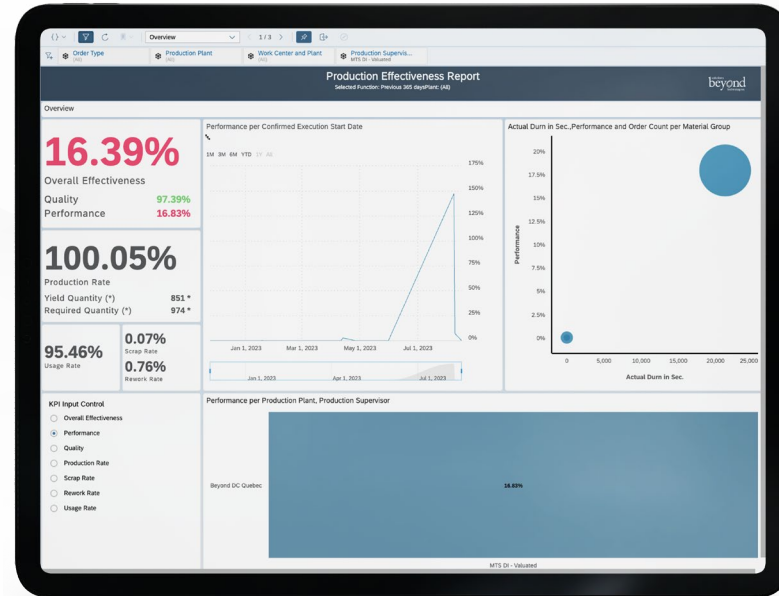

- **Reporting & Planning**
SAC, SAC Planning, S/4HANA Embedded Analytics, Analytics on CAR, SAP BusinessObjects
- **Data Warehousing & Data Lake**
SAP Datasphere, SAP HANA Cloud Data Lake, SAP BW
- **Data Orchestration**
SAP Data Intelligence Cloud, SAP Data Services

Benefits and Features

Production Effectiveness Report –
Get comprehensive, single-view data on KPIS at the work center level and predict production issues before they happen.

Analyze based on:

- + Work centers overview
- + Manufacturing orders and operations overview
- + Calculation of OE and other KPIs for YTD, Prev YTD, and MTD
- + Greater proactivity in identifying production problems
- + At-a-glance performance analysis of production efficiency
- + Identification of trends based on historic KPI analysis

Benefits and Features

Production Plan Attainment –

See how each work center, plant, and management team is performing on a week-to-week basis with a Production Plan Attainment solution which predicts trends from deep data analytics.

Analyze based on:

- + Weekly production plan attainment snapshot
- + Easy comparing of weekly attainment across work centers, work center management, plants, materials, and/or material groups
- + Identify production plan attainment and production operations trends
- + Predictive identification of potential production issues including scrap, rework, missing production, and production variance

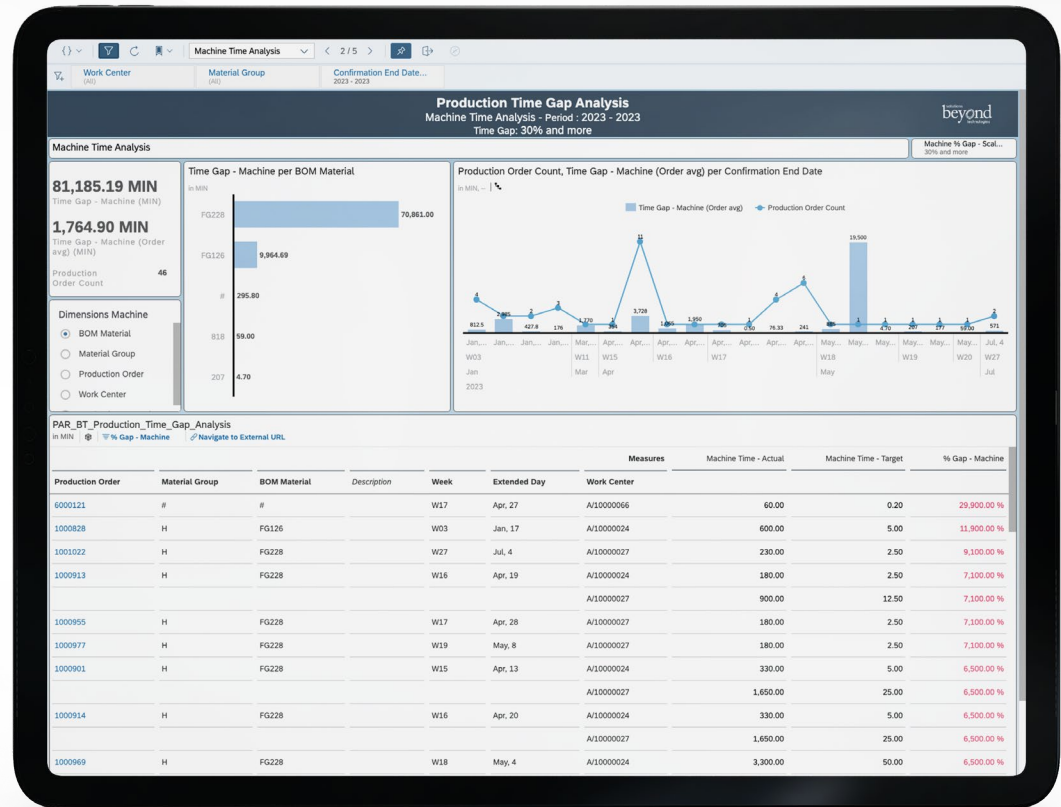

Benefits and Features

Time Gap Analysis – Identify time gaps between production stages to pinpoint bottlenecks in your processes and improve overall efficiency based on performance trends and opportunities for workflow optimization.

Analyze based on:

- + KPI-based production time gap analysis of Previous Year, Month / Quarter / Year to Date, material group, production order, work center, supervisor, and BOM material
- + Tailored reports leveraging numerous filters and axis of analysis as a variant
- + In-depth SKU comparison over time
- + Identify issues involving machine time, set up time, labor time, and work center
- + Quick access to production orders on SAP for detailed information
- + SAC reporting with historical trends of production time gaps, easy KPI-target comparison, and drilldown capacity on production orders
