

Beyond Technologies for retailers

GO BEYOND RETAIL

Bring your existing SAP solutions to
the next level with Beyond's tailored
industry accelerator

The retail industry today

Retail has become one of the industries most impacted by the advancements of digital transformation. The way consumers make their purchasing decisions has dramatically changed. Consumers can now walk into a store using their smartphones to compare prices and review products and are also influenced by social media in their decisions, having more online options to choose from.

Without the proper retail expertise, your SAP solutions can only get you so far in addressing some of the challenges in the retail economy. In addition, finding and hiring retail experts and consultants can be costly and they may not have the SAP expertise to help you get the most out of your SAP Retail solution. Beyond Technologies offers you the best of both worlds; experts with years of practical retail experience backed by solid knowledge of the SAP retail solution.

How can you improve your current SAP landscape?

The coexistence of too many different solutions leads to higher costs and inconsistent data from multiple databases, which represents a major obstacle to omnichannel integration and digital transformation. Retailers need a fully integrated solution to transform and simplify their operations.

The Beyond Technologies team has combined their many years of experience and vast retail expertise to create Beyond's Retail Accelerator, a proprietary solution designed for a wide range of retail and wholesale segments. The Beyond Retail Accelerator is an extensible and future-proof solution that provides optimal support for retailers.

By conducting a detailed assessment of your current context through our Discovery process, Beyond can help you determine the best path to support your business strategy and improve your existing SAP solution.

Are you:

Planning a move to S/4HANA Cloud or on premise?

Already using retail-specific SAP solutions?

Using a web store? On which platform?

Using POS, WMS or other solutions nearing end of life?
